

Hazardous Management (HM)/ Hazardous Waste (HW) Refresher Quiz

1. Which is known as the "cradle to grave" law?

- NEPA
- RCRA
- SARA
- CERCLA

2. Characteristic HW include those that are:

- ignitable, caustic, reactive, or toxic
- flammable, toxic, corrosive or reactive
- corrosive, reactive, toxic or ignitable
- poisonous, corrosive, ignitable, or explosive

3. You just broke a one-gallon bottle of acid in your work area. What is your first step in responding to a spill?

- Stop the flow
- Protect yourself
- Report the spill
- Contain the spill

4. What regulatory agency specifies requirements for the HAZCOM program?

- Center for Disease Control (CDC)
- Department of Transportation (DOT)
- Environmental Protection Agency (EPA)
- Occupational Safety & Health Administration (OSHA)

5. Personnel must complete HW training within _____ after date of employment or assignment?

- one year
- six months
- thirty days
- three months

6. Occupational Safety and Health Act requirements include:

Establishes specifications for containers, labels, and placards for transporting hazardous materials/waste.

Defines responsibilities, limitations and liabilities for hazardous waste.

Establishes requirements for protecting the health and safety of workers in various occupations.

None of the above

7. The blue-and-white label on waste containers denotes what type of waste?

Hazardous Waste

Not a valid label

Regulated Medical Waste

Non-RCRA Regulated Waste

8. Blood Borne Pathogen Standard requirements:

Personal Protective Equipment

Sharps Containers

Universal Precautions

All of the above

9. Containers used to store HW must be kept closed at all times unless adding or removing waste.

True

False

10. All containers must be labeled and include the following information:

Generator information and proper shipping name

EPA ID number and EPA waste number

Accumulation Start Date (ASD)

All of the above

11. At a Satellite Accumulation Point (SAP) the generator must:

Before transporting hazardous waste containers off-site, they must be labeled in accordance with the Department of Transportation (DOT) requirements.

Accumulate up to 55 gallons of HW in containers located near the point of waste generation.

All of the above

None of the above

12. Good management of HW does NOT include:

- Use of secondary containment to prevent spills.
- Ensure all waste is properly segregated and containerized.
- Maintain a HW inventory log.
- Place unknown waste in general trash.

13. Universal Waste includes:

- Unused pesticides that are suspended, canceled or recalled.
- Accumulation time of 1 year (8 months at your site).
- Used batteries, mercury, thermostats & mercury-containing lamps.
- All of the above.

14. Managing HM should NOT include

- Maintain MSDSs/SDSs for each HM on-site.
- Overstocking HM to ensure you have enough on hand.
- Maintain a HM inventory log.
- Property storing HM.

15. DPW-Environmental Division (ED) must approve all Government Purchase Card HM materials purchases outside of the installation procurement system.

- True
- False

This completes the quiz. Next, select 'Submit Form' button at the top right corner, this will generate an email to the training POC. Please be sure to insert your full name to receive proper credit. quiz to the Environmental office. In addition to the quiz, you are required to submit a completed registration form as an attachment w/your quiz. Once you have submitted all documents, exit out of the form by closing your browser.
