

Field Service Technician-Sr.

Augusta, GA Semper Valens Solutions

**** Requires active Top Secret /SCI clearance ****

Semper Valens Solutions is actively seeking an Field Service Tech for Ft. Gordon, Georgia.

The Distributed Common Ground System-Army (DCGS-A) Field Service Tech (FST) will provide technical support of the DCGS-A, Army Division. The DCGS-A FSA serves as a member of a globally distributed team that fields, repairs, integrates, and maintains client and server systems for the DCGS-A Programs. DCGS-A systems are a diverse mix of software and hardware solutions designed to meet challenging intelligence processing, exploitation, and dissemination requirements for the Army at war. DCGS-A features unique data scalability requirements and allows for a flexible system evolution.

Technicians working on the program are required to solve hardware and software challenges across three different fielded hardware and software baselines. The Tech will identify server and client hardware and software faults, create solutions, and then test solutions in often demanding field environments. The FST will interact with a wide variety of systems implementations on a single customer site, including Virtualized Machines (VMs) running on a variety of different hardware platforms.

The successful candidate will have extensive software, hardware, and network troubleshooting experience. The candidate will be able to install, maintain, and troubleshoot Windows and Linux-based operating systems and software on client and server machines. Candidate will have project engineering experience and familiarity with remote system administration software and networking principles.

Bachelors Degree in a Computer Science or related technical discipline.

Three (3) additional years of applicable experience may be substituted for the degree.

Require DoD 8570 IAT Level II baseline and operating system (Security+CE required) certification or higher.

6-8 years of directly related computer systems analysis and/or systems experience.

Candidate should possess technical and/or operational experience with 1 or more Army Intel Systems such as:

DCGS-A (Mobile) Family of Systems (FoS)

IPC(v)1 - Intelligence Processing Center (v)1
IPC(v)2 - Intelligence Processing Center (v)2
TGS - Ground Station, Tactical Intelligence
CHARCS - Counterintelligence Human Intelligence Automated Reporting and Collection System
ENFIRE - Instrument Set, Reconnaissance and Surveying
Prophet
DCGS-A (Fixed) Family of Systems (FoS)
OGS - Ground Station, Operational Intelligence
CIED - Counter-Improvised Explosive Device

Applicant must be able to deploy to hazardous duty locations.

Candidate must be able to maintain compliance with the standards of fitness requirement at all times throughout the period of performance of the task order.
